SKILLS

- Programming Languages: Swift, Objective-C
- iOS Development: UIKit, Core Data, Core Animation
- Version Control: Git, GitHub
- Mobile Design: Interface Builder, Auto Layout
- Debugging and Testing: Xcode, XCTest
- API Integration: RESTful APIs
- Agile Development: Scrum methodologies
- Software Engineering Principles

Language

English

EDUCATION

MAY 2023

Associate of Science Computer Science And Programming

Lonestar, Lone Star, TX

Projects:

Task Manager App (iOS)

- Developed a task management iOS app using Swift and CoreData, allowing users to create, edit, and organize tasks efficiently.
- Implemented a user-friendly interface with responsive design and intuitive navigation, improving the overall user experience.
- Utilized Core Data for data persistence and employed Git for version control and collaboration.

Weather Forecast App (iOS)

- Collaborated in a team of developers to create an iOS weather forecast application using RESTful APIs to fetch real-time weather data.
- Integrated the app with MapKit for location-based weather updates and utilized Swift for frontend development.
- Conducted thorough testing and debugging to ensure optimal performance and user satisfaction.
